THE DIFFERENT TYPES OF COPPER CONNECTIVITY MODULES (CCM) ARE INDICATED VIA COLOURS TO BETTER BE IDENTIFIED IN THE TABLE:

CAS-PRE		Cassette System - Pre-terminated
CAS-NC		Cassette System - Single Cassette not connected
KSM-HD		Keystone Module - High Density
KSM-SD		Keystone Module - Standard Density
FM-SL-HD		Factory Made - Single Link - High Density
FM-SL-SD		Factory Made - Single Link - Standard Density
ILC-SD		Inline Coupler - Standard Density

THESE SHORTS IN THE TABLE ARE OFFICIAL TKM ABBREVIATIONS AND USED IN THE STANDARD PRODUCT DOCUMENTS:

CH	Chassis for Cassette System
SUBRACK	3U Subrack
PP	Patch Panel
MPP	Mini Patch Panel
WO	Wall Outlet
THR	Top-hat Rail
CAS	Cassette System - Pre-terminated Cassette or single Cassette not connected
CCM	Copper Connectivity Module (generic term for KSM, CAS, FTC, etc.)
KSM	Keystone Module
HD	High Density
SD	Standard Density

GENERAL EXPLANATION OF THE COMBINATION OF HD OR SD HOUSING TO BE EQUIPPED WITH HD OR SD CCM:

HD ↔ SD Compatibility:	All Housing types with HD character require HD (small) CCMs
	All Housing types with SD character (more space between the outlets) can be equipped with HD or SD CCMs

SOME PRODUCTS ARE MECHANICAL COMPATIBLE BUT NOT RECOMMENDED TO BE USED WITH EACH OTHER:

- Fully compatible
- Mechanically compatible but not recommended because both CCM and Housing have dust covers

OTHERS

*4647500K-OZS

The main frame can be equipped to: 4640085G-7035 or 4640080G-7035
